# BEDDING PLANTS AND BULBS FOR THE HOME GARDEN

LANDSCAPE SERVICE WITH A COMPLETE  
LINE OF NURSERY STOCK

*Flowers for All Occasions Grown by*

VALENTIN BURGEVIN, INC.  
KINGSTON NEW YORK

**VALENTIN BURGEVIN, INC.**  
**KINGSTON. NEW YORK**

*Announcing*

**A NURSERY AND LANDSCAPING DEPARTMENT**

**NURSERY**—Stocked with over 10,000 evergreens with many varieties, all transplanted with fine root systems, pruned and sheared to effect shapely plants and proper growth—in addition to approximately 50 varieties of ornamental trees, shrubs, hedge plants—as well as 150 varieties of perennials, including many choice, but inexpensive Rock Plants—.

We have established this department owing to the pressing demands of many of our patrons and assure them that our usual high quality and economical service will be maintained.

**LANDSCAPE DEPARTMENT**—Based on our many years of previous experience and success in this phase of the business, we are offering to our customers a guaranteed satisfactory service in landscape design and planting. We are prepared to make technique, quality and economy the important factors of this service. We have the facilities for executing any size commission.

**PRICES AND RATES**—Evergreens and all nursery stock are at a lower price than it has ever been possible to buy them. Estimates of any size planting will be gladly furnished. Plans and specifications prepared without charge.

*Nursery open at all times for inspection—located in rear of greenhouses.  
For additional information write or phone. Telephone 430.*

# *Burgevin's*

## **EIGHTY SECOND YEAR**

THRIFTY gardeners have long found it pays to buy their plants where they not only obtain the finest quality, but where they can get quality plants at a price. The House of Burgevin has, since its small beginning in 1852, striven earnestly and honestly to give to their customers the best quality stock at a small margin of profit. With reduced overhead expenses and considerable savings in operation expenses, we have been able to keep our low prices and, in many cases, even reduced them.

This policy of the best value at the lowest price has enabled us to build up a large production. We have reached more people and made a great many more friends than it ever would have been possible if high prices had obtained. We value our customers and all those who have helped and are helping to make our business of growing a success.

In making a garden the best efforts and careful cultivation does pay, but the start is to procure healthy, clean stock that has been grown properly.

We are always willing to advise in any way possible concerning problems of gardening and landscaping. We have associated with us a graduate landscape architect who may be consulted at any time. He is fully prepared to undertake or advise concerning any size commission.

## **VALENTIN BURGEVIN, INC.**

*Florists - Nurserymen*

**Pearl Street :: KINGSTON, N. Y.**

**Flower Shop and Office, Building Corner of Fair and Main Sts.**

TRANSPORTATION CHARGES. We make no parcel post charges on orders of \$1.00 or more. Less than \$1.00, add 20 cents.

GOODS EN ROUTE. Transportation company is responsible for goods en route. Notify them at once if parcel arrives in an unsatisfactory condition.

LOCATION. Our great range of greenhouses and nurseries are located at the end of Pearl Street. Flowers and plants of unusual beauty and charm can be seen here every season of the year.

TELEPHONES. Greenhouses and nursery: Kingston 430; Store 874. Those finding it necessary to phone on Sundays, holidays and evenings, are requested to call any of following numbers: 3129-M, 4203-W, 897, 1092.

## DUTCH BULBS

We do not list the numerous varieties of these bulbs that are so essential to beautify a Spring garden. We merely make mention of the fact that our stock is widely assorted and take pride in the uniform quality and size that has been traditional with us. There are many varieties admirably suited for planting in the rock garden, however small. Bulbs ready after September 15. A price list of varieties will be gladly sent upon application.

*Darwin Tulips Along Border of Driveway*

### NO. 1 COLLECTION

Darwin Tulips in best mixture.

**\$2.50 per 100**

### NO. 2 COLLECTION

Contains over 20 named varieties.

**\$3.25 per 100**

**MUSCARI**

## ROCK GARDENS

***We will build a complete Rock Garden for \$25.00***

This includes stones and plants as well as designing and necessary labor

*Chart showing depth and distance apart at which the different types of bulbs should be planted*

**Vigoro** should be applied to the soil when the bulbs are planted in the Fall. This insures a good root development and better matured bulbs for the next year's bloom. 2 lbs. to every 50 square feet of row or 4 lbs. for every 100 square feet is the right amount to use.

## Hardy Japanese Lily Bulbs . For the Garden

**AURATUM.** Petals cream white, spotted red, with a golden band running through each petal. 50c. each, \$5.00 per doz.

**ALBUM.** Pure white. 50c. each, \$5.00 per doz.

**MAGNIFICUM.** White edged and spotted pink. 50c. each, \$5.00 per doz.

**MADONNA LILY** (*Lilium candidum*). This beautiful pure white Lily is best grown in the cool climate of the north of France from where we obtain our bulbs. A strong, vigorous growth should be expected from our mammoth size bulbs. Plant them in August. 35c. each, \$3.50 per doz.

**REGALE.** One of the most beautiful of hardy Lilies, flowers creamy white, fused with pink with a golden yellow center. Delightfully fragrant.

Mammoth size bulbs, 50c. each, \$5.00 doz.

*Lilium auratum* grown from a bulb obtained at Burgevin's

## Gladiolus

As cut flowers, these are unsurpassed by any other Summer flower. By successive plantings they can be brought to bloom continuously throughout the Summer. Our bulbs treated for thrip and free from disease.

**Special Collection, 20 varieties, separate and distinct colors, 40c. per doz., Others to \$1.00 per doz.**

Large-flowering  
Petunia, (See page 6)

Cut flowers always obtainable in unusual variety where they come fresh from our 35 green-houses.

## Tender Plants For Bedding

For lack of space we do not list all varieties of bedding or house plants. We have selected the more desirable ones—an inspection of our green-houses will reveal many others of new interest and charm. Those marked (\*) are most suitable for window boxes, hanging baskets, etc. Because of frost and climatic conditions we do not advise planting these out in the open until after May 15th.

As a complement to rock gardens they are indispensable. Price list of collections and varieties gladly sent on request

Try our Special Collection of 12 Decorative Dahlias, \$2.50 per 12

## ROSES

### SOME NOTES ON THEIR CULTIVATION

Before planting, dig the bed up from 12 to 18 inches deep, incorporating an abundance of well rotted manure. When planting, insert the plant in the ground so that the graft is covered to 2 or 3 inches below the soil level, taking care to make the soil firm around the plant, leaving a depression around the plant to hold the water.

Roses need lots of water when dry and it is important to give the plants a thorough watering. Roses need an abundance of fertilizer. Bonemeal is very beneficial. However Vigoro, the prepared fertilizer is recommended because it is a complete plant food furnishing every food element the plant requires.

When syringing Roses, always do so in the morning and only when the sun is shining. This allows the foliage to become dry before the evening. Damp or wet foliage will cause black spot and mildew.

In the Fall, before the ground freezes, the Hybrid Tea Roses should have a mound of soil placed around the plants from 10 to 12 inches high. After the ground is frozen to a depth of 3 or 4 inches, the entire bed should be covered with salt hay or coarse horse manure to a depth of 6 inches. Hybrid Perpetual Roses do not require the mounding of the soil around them, but the covering of the soil with coarse manure or salt hay is beneficial for these also.

Our Roses are all pot-grown and can therefore be planted out any time without disturbing the roots.

We have about 40 of the best varieties, including the new introductions, and recommend each one for its habit of growth, hardiness, productivity and its color.

## ***Grafted — Hybrid Tea Roses — Potted***

These varieties are outstanding in every way. We have many other varieties not listed—all with excellent habits and the same fine qualities.

The price is 50c.-75c.-\$1.00 each,  
\$5.00-\$7.50-\$10.00 per doz.

**Angele Pernet.** Salmon pink.  
**Caroline Testout.** Soft pink.  
**J. L. Mock.** Dark pink.  
**Lady Alice Stanley.** Light pink.  
**Lady Margaret Stewart.** Sunflower yellow.  
**Margaret McGredy.** Oriental red.  
**Mme. Edouard Herriot.** Saffron yellow.  
**Mme. Leon Paine.** Silvery salmon.  
**Mrs. Aaron Ward.** Orange yellow.  
**Mrs. Lovell Swisher.** Copper salmon.  
**Mrs. M. C. Miller.** Pink.  
**Mrs. W. C. Egan.** Two-tone pink.  
**Padre.** Coppery scarlet.  
**Radiance.** Pink.  
**Red Radiance.** Red.  
**Rev. F. Page-Roberts.** Coppery red.  
**Talisman.** Apricot, gold and pink.

*Mme. Edouard Herriot*

## **Hardy Hybrid Perpetual Roses**

**PLANTS ALL GRAFTED**

*Mrs. W. C. Egan*

This class of Roses, while not so floriferous, are extremely hardy and will withstand the coldest Winter with very little protection. A few varieties herewith listed.

Zinnia, Mammoth, or Dahliaflowered	.50	3.50

# Hardy Perennials

Those marked with (\*) are excellent for shady places.

Our perennials are all well established, pot-grown plants, and can therefore be planted at any time without checking growth. However, the best time for planting is in the Spring when they are starting to grow. Avoid planting in wet soil; it is always better to wait until the ground is fairly dry. Most perennials, although really hardy, should have protection during the Winter—care should be taken in covering them so they will not smother. A light covering of leaves, salt hay or straw is excellent, making sure the base of the plant is well protected.

Although perennials perhaps need less care than other plants, one will be repaid in the porportion of care he is willing to give them

in the form of water in a dry time, working the soil, mulching and applications of fertilizer at regular periods.

Compost shed and pile—one of the few of its kind to be found anywhere. A new pile of this soil is made each year and is used in the growing of our plants

Lawn Grass Seed

HOW TO PREPARE A LAWN

Proper soil and a good mixture are the two essentials to be considered when making a lawn. Seed will be found to be the least expensive item. The first step is to break up the ground by ploughing or spading. Incorporate manure if available into the soil using one load to an average 100 square yards, keeping it well near the surface. If manure is not available, a commercial fertilizer such as Vigoro is recommended—5 lbs. to 100 square feet is sufficient at first. Ground in a shady place will probably need a light application of lime. Clay soils should have a mulch of leafmold or Driconure, which is a mixture of peat moss and dehydrated cow manure.

Before seeding care should be taken to rake the surface well by removing weed roots and stones and breaking up lumps of earth. The final step before seeding is to rake the surface until it becomes smooth and fine. Seed should be sowed according to the above chart after which it should be thoroughly rolled in.

Our formula contains a balanced proportion of the following grass seeds:  
Red Top, Chewings Fescue, White Clover, German Bent, Kentucky Blue Grass

HOW MUCH SEED TO SOW		
Area	No. Sq. Ft.	Seed
10x10.....	100.....	1 lb.
20x10.....	200.....	2 lbs.
25x20.....	500.....	5 lbs.
40x20.....	800.....	8 to 10 lbs.
100x20.....	2,000.....	20 lbs.
200x50.....	10,000.....	100 lbs.
For renovating lawns, one-half of above quantities is recommended		

Burgevin Formula for Sunny Places

(Containing 10% Bent)

Tests have shown this seed to be ideally adapted to our climate. It is a special formula created after years of experience and trial. Containing no annual or quick-sprouting seeds that make only a temporary lawn, it is a mixture that actually improves from year to year. For its high quality this seed is very low priced and is equal to some brands that sell for nearly twice as much.

Lb. 45c., 2 lbs. 90c., 5 lbs. \$2.25, 10 lbs. \$4.25, 20 lbs. \$8.50

Burgevin Formula for Shady Places

Lb. 50c., 2 lbs. \$1.00, 5 lbs. \$2.40, 10 lbs. \$4.75, 20 lbs. \$9.00

Fertilizers

PEAT MOSS

Finely granulated. This is comparatively a new product in itself. It has not much value as a fertilizer, but it is valuable when incorporated in the soil, holding moisture, and when decayed, as a substitute, for stable manure. We recommend it highly.

Bale.....\$3.50

## BOVUNG

**A Natural Organic Fertilizer**

A rich manure from cows—the ideal fertilizer for New Lawns and for restoring the worn-out grass plot to its original vigor.

Through a special process practically all moisture is removed from Bovung soon after it has been taken from the barns.

Bovung is absolutely free of all live weed seeds, it cannot bring plant diseases to your garden, and while a little goes far, no harm will occur through fertilizing your lawn or garden freely.

Bovung broadcasts as readily as grass seed and we suggest three applications upon your lawn throughout the year, in the early Spring, again in Midsummer, and finally early in the Autumn.

Bovung, too, is an excellent fertilizer for the flower and vegetable garden, being of an organic nature it brings to the soil just those materials in which the average garden soil is lacking. Bags of 50 lbs. \$1.50.

Insecticides

**Ant Killer—Dolco.** Non-poisonous to humans and animals. This is the best ant eradicator we know of and is effective outdoors or inside. 50c. per pkge.

**Aphine.** For green and black aphid and red spider. Dilute 1 part to 40 parts of water. 1/2 pt. 50c., pt.

75c., qt. \$1.25, gal. \$3.00.  
**“Black Leaf 40.”** For spray, for aphid on fruit trees and shrubbery. Oz. bottle 35c., 5 oz. bottle \$1.00, 2 lb. bottle \$3.10.

**Double X.** A new double action insect powder. Exterminates ants, roaches, chicken lice and their eggs. \$1.50 per lb.

**Fungine.** For fungous growth and mildew. Pt. can 75c., 1/2 pt. 50c.

**Mice and Mole Cereal—Dolco.** Made by the same firm which makes Ant Killer and Weed Killer. A quick, sure destroyer. 35c. per pkge.

**Nicotine Pyrox.** Combining Bordeaux Mixture with arsenate of lead. A safe insecticide for tender foliage. Lb. 50c.

**Rat Scat.** Non-poisonous rat destroyer. 75c. per can.

**Slug Shot.** For bugs that eat foliage. Pkg. 20c.

**Pomo-Green with Nicotine.** The leaf green dust. Protects your Roses and other flowering plants against both insects and fungous diseases without making the treatment conspicuous. Best for your garden, too. Pomo-Green with Nicotine is the celebrated Massey Dust made more toxic and colored green.

Roses: Pomo-Green with Nicotine prevents and controls black spot, mildew or chewing insects quickly and effectively. Flowering Plants: Pomo-Green with Nicotine is effective for the control of Snapdragon rust, Carnation rust, Sweet Pea mildew, Phlox mildew, Lilac mildew and many other fungous diseases of flowering plants and shrubs. Protect new growth by dusting with Pomo-Green with Nicotine once each week throughout the growing season. 1 lb. can 75c., 5 lb. carton \$3.00.

**Tobacco Soap.** Dissolve in water for spraying. Also for scale on palms or other foliage plants. Cake 20c.

**Tree Wound Paint.** 1/2 pt. 50c., pt. 75c.

**Vermine.** To kill maggots and insects attacking root of plants. 1/2 pt. 50c., pt. 75c., qt. \$1.25.

**Weed Killer.** \$1.50 per gallon.

## A Note on the Care of CUT FLOWERS and CONSERVATORY PLANTS

To prolong their life and fragrance, the stems of flowers should be cut off each morning when the water is changed. They should be placed in a cool room overnight with their stems immersed as deeply as possible in water. Rose buds should be sprayed with clear water.

Hardwooded flowers keep better sometimes if the tips of the stems are crushed. This allows them to absorb more water. Dahlias, after being cut, are sometimes plunged up to the flower in hot water and immediately taken out and put in cold water, thus allowing them to hold their heads up and keep fresh for a longer time. When placing flowers in a bowl never allow the stems to touch the bottom as this will cut off the necessary supply of water.

## THE CARE OF PLANTS

All blooming plants should be watered at least once, and perhaps twice, daily, and their period of blooming will be increased if kept in a light, cool room. The leaves of any plant should be kept free from dust.

The cool days of Winter are cheered by pretty flowering and foliage plants; but while they are particularly fascinating at this time, it is during the coldest days that the plants require the most attention.

Never allow them to stand in front of an open window or in a cold draught. The intense dry heat in homes on extremely cold days will dry out the soil and wither or permanently injure most plants in a few days unless carefully watched and given water accordingly.

A good plan to follow in watering plants is to allow the soil to become dry or partially dry before watering and then repeating the process. Plants like Cyclamen and bulbous plants require a relatively frequent watering, while hardwooded plants such as Azaleas and Geraniums, a lesser amount is sufficient to their care.

*A View of One Block of Our Evergreens*

# PLANTING TABLE

The table shows the number of plants required to fill a circular bed of the dimensions given. In planting, begin outside row—where 6 inches apart, 3 inches from edge of bed; where 12 inches apart, 6 inches from edge of bed. It is customary among professionals in planting a bed to set the plants somewhat closer together in the two outer rows, giving more space between each plant towards the center of the bed.

A square bed will take about the same number of plants. For an oval bed, add length and breadth and divide by 2. For example, an oval 7 feet long by 5 feet wide will require same number of plants as a circular bed 6 feet in diameter.

Diameter of bed	6 in. apart	12 in. apart	18 in. apart	24 in. apart	30 in. apart

## WE GROW OUR OWN

Our plant consists of 35 greenhouses and nearly 200 acres on which our nurseries and dairy farm of pure-bred guernseys is located. Burgevin's flower shop and office building is located at the corner of Fair and Main Streets where a great assortment of flowers is always available for every occasion.

People are always welcome to go through our greenhouses—nurseries, and farm at any time. We are only closed for business on Sunday and holiday afternoons.
